Also remember to target your testing towards what the end users of this web service will be using. If you have written a Java web service but it is being consumed by .Net clients then make sure you test the service against a .Net client. SOAP services are especially troublesome when it comes to consistent cross-platform behavior.

Okay - I'm looking for something that I'd think would be relatively straight-forward and simple to find: a tutorial for writing a java web services client. I don't want one that shows me how to do it through Sun Studio, or Java Studio, or NetBeans. I want something that walks me through the dirty details. I want to build it from the command line.

### **Java Web Services Client Tutorial | Oracle Community**

JAX-RS stands for JAVA API for RESTful Web Services. JAX-RS is a JAVA based programming language API and specification to provide support for created RESTful Web Services. Its 2.0 version was released on the 24th May 2013. JAX-RS uses annotations available from Java SE 5 to simplify the development ...
