Why wont the Kenmore 70 series washer timer advance to end the wash cycle and empty the tub, spin and go to the rinse cycle? It that fills normally and starts agitation. I have tested the start capacitor to ensure the motor is running properly and have replaced the timer assembly. Can I get a wiring diagram for the washer?

I have a Sears Kenmore Series 70 Washer that won't spin, agitate or drain. My wife said she started it and after it stopped filling (seems to be about full of water), it simply stopped. It doesn't spin, agitate, or drain. The wall plug works ok but the machine acts as if it's completely dead. I would sort of expect the lid switch or the timer.
