The engine system, in conjunction with the engine control module (ECM)/powertrain control module (PCM), activates the C1201 code solenoid valve to control oil pressure to the engine mechanism that is installed in the valve system to switch valve timing between Low and High.If the engine solenoid valve has an open or short circuit, a DTC is stored.

C1201 Engine Code Meaning - C1201 Engine Trouble Code ...

No problem, sorry i don't have a concrete answer. I'm pretty sure C1201 is a result of a malfunction because it even says if any trouble occurs in the engine control system, the ECU prohibits the TRAC control. There is no diagnostic for this code other than to repair the existing codes that are output, from my understanding.
