This is a reflective essay based on my experiences whilst on my six week medical placement on a haematology ward at a local hospital. The aim of this essay is to discuss the psychological and sociological impact on the family when a loved one dies, and then focus on how the nurse supported the husband and relatives through their loss.

Essay on Reflective Practice in Oncology Nursing - 3654 Words

A large number of companies are looking for ways to maximize the abilities of their personnel to help them to bring more "to the table". They are looking for individuals with the skills to communicate more efficiently, to improve negotiation techniques, with the ability to be an integral part of a team while also having strong leadership qualities.

Menopause, also known as the climacteric, is the time in most women's lives when menstrual periods stop permanently, and they are no longer able to bear children. Menopause typically occurs between 49 and 52 years of age. Medical professionals often define menopause as having occurred when a woman has not had any vaginal bleeding for a year. It may also be defined by a decrease in hormone ...
