Harley-Davidson Ironhead engine. The ironhead was a Harley-Davidson motorcycle engine, so named because of the composition of the cylinder heads (Iron instead of Aluminium). The engine is a two-cylinder, two valves per cylinder, pushrod V-twin. It was produced from 1957 until 1985 and was replaced by the Evolution engine in 1986. This name...

Harley-Davidson Ironhead engine - Wikipedia

All in all, the XL is a better bike than the big twin. And the Ironhead is emblematic of everything that is raw and nasty about Harley. The XL Evo is a damn good motorcycle; it fixes the ills of the earlier XLs, but just doesn't capture the essence of the earlier XL. There is nothing like an old Ironhead for peeling the pavement off the road.

I removed the engine from the frame and after installing the weld on kit and had the frame powder coated semi gloss black. The tank is the original Harley Davidson 2.4 gallon peanut tank with no dents or dings or scratches and was powder coated a darker red with some metallic. The Ironhead decal on the tank is removable if you want.

I have always had Evo big twins. I know what I can do to improve performance and at what cost. They are the best all around engine for performance and reliability. This is pretty much a industry given. A few months back I aquired a 74 ironhead sporty for a rediculous price. As always once I started to clean it up and get it running, I started changing and "improving" what I had.
