The amino- and phosphorus-codoped (N,P-codoped) porous carbons derived from oil-tea shells were facilely fabricated through a combination of phosphoric acid ( $H_3PO_4$ ) activation and amino (polyethylenimine, PEI) modification method. The as-synthesized carbon adsorbents were systematically characterized and evaluated for Cr(VI) removal in aqueous solutions.

**Enhanced Cr(VI) removal by polyethylenimine- and ...**

Nitrogen compounds have a very long history, ammonium chloride having been known to Herodotus. They were well known by the Middle Ages. Alchemists knew nitric acid as aqua fortis (strong water), as well as other nitrogen compounds such as ammonium salts and nitrate salts. The mixture of nitric and hydrochloric acids was known as aqua regia (royal water), celebrated for its ability to dissolve ...

The metal smelting and refining industry processes metal ores and scrap metal to obtain pure metals. The metal working industries process metals in order to manufacture machine components, machinery, instruments and tools which are needed by other industries as well as by the other different sectors of the economy.

**Chapter 82 - Metal Processing and Metal Working Industry**

Mission, Vision, and Values. Mission and vision both relate to an organization's purpose and are typically communicated in some written form. Mission and vision are statements from the organization that answer questions about who we are, what do we value, and where we're going.

**Developing Mission, Vision, and Values**

ICRIER started the Regional Insights initiative in 2008. The rationale is that research on India's relations with other countries will have to take on board the increasing demand being placed on India for a major role in international discussions on evolving a new global social, economic, financial and environmental architecture.
