anything which they wants to do. Whereas decision making is a process of selecting the best among the different alternatives. Decision-making involves the selection of a course of action from among two or more possible alternatives in order to arrive at a solution for a given problem. Risk and uncertainty is incorporated during the decision making.

An Overview on Decision Making Under Risk and Uncertainty

Formal models of decision making under risk and uncertainty (such as statistical decision theory, discussed in Section 2.3) have predominantly focused on analytic decision making, even though researchers have long been aware that abstract statistical evidence is typically at a disadvantage when people have a choice between it and concrete ...
