Scientific management is a theory of management that analyzes and synthesizes workflows. Its main objective is improving economic efficiency, especially labor productivity. It was one of the earliest attempts to apply science to the engineering of processes and to management. Scientific management is sometimes known as Taylorism after its founder, Frederick Winslow Taylor.

### **Scientific management - Wikipedia**

The Principles of Scientific Management is a monograph published by Frederick Winslow Taylor. This laid out Taylor's views on principles of scientific management, or industrial era organization and decision theory. Taylor was an American manufacturing manager, mechanical engineer, and then a management consultant in his later years. The term "scientific management" refers to coordinating the ...
