I don't know if ours is the 466e, or just the plain old 466, but either way it seems part of the problem is how tiny the radiator fins are. Lots of crap gets stuck in there and is a serious pain to get out.

Intl. 4300 Dt466 Overheating | The BuzzBoard

the 04 engines start with s/n 2,000,000 have the egr and variable turbo. the model years of engine don't always match the body. depends on when they release the bus from the plant. as mod stated the ecm power supply wiring connector needs to be checked / removed crimped and soldered. i have also seen the battery cables loosened by closing the battery box causing some of these symptoms. your ...

The Diesel engine (also known as a compression-ignition or CI engine), named after Rudolf Diesel, is an internal combustion engine in which ignition of the fuel, which is injected into the combustion chamber, is caused by the elevated temperature of the air in the cylinder due to the mechanical compression (adiabatic compression). Diesel engines work by compressing only the air.
