The gravity model of international trade in international economics is a model that, in its traditional form, predicts bilateral trade flows based on the economic sizes and distance between two units.. The model was first introduced in economics world by Walter Isard in 1954. The basic model for trade between two countries (i and j) takes the form of  $T_{ij} = k \frac{Y_i Y_j}{D_{ij}}$

Outsourcing is an agreement in which one company hires another company to be responsible for a planned or existing activity that is or could be done internally, and sometimes involves transferring employees and assets from one firm to another.. The term outsourcing, which came from the phrase outside resourcing, originated no later than 1981. The concept, which The Economist says "made its ...

Denise Harrison's research career began as a single clinical question; "how can we reduce pain during painful procedures in sick babies?" This came after working for many years in neonatal and pediatric intensive care units where infants and children are exposed to a large number of painful procedures during their care.

1. Introduction. This paper empirically investigates the impact of online e-commerce on cross-border trade patterns. The rise of the internet and, more generally, digital communications technology, has led many observers to announce the "death of distance" (Cairncross, 1997). In this view, it does not matter anymore where information is located since it is only a mouse click away and ...
