### **Cost Accounting - Investopedia**

Cost accounting is the process of recording, classifying, analyzing, summarizing, and allocating costs associated with a process, and then developing various courses of action to control the costs. Its goal is to advise the management on how to optimize business practices and processes based on cost efficiency and capability.

### **Cost accounting - Wikipedia**

Process Cost System Some companies have homogeneous or very similar products that are not made to order and are produced in large volumes. They continually process their product, moving it from one function to the next until it is completed.

### **Process Cost System - CliffsNotes Study Guides**

In process costing it is the process that is costed (unlike job costing where each job is costed separately). The method used is to take the total cost of the process and average it over the units of production.  $\text{Cost per unit} = \frac{\text{Cost of inputs}}{\text{Expected output in units}}$  Important terms to understand
