### **Dell PowerEdge R710 - Dell United States**

I realize the Dell PowerEdge R710 is an old device. But you can get them so cheap I'm curious if for building a NAS I would get more performance out of an R710 with an 6 core Xeon and like 48 gigs of RAM for like 250 bucks instead a newer system for no more then \$500 USD. I don't care about power usage or noise.

### **Dell PowerEdge R710 used as a NAS? | iXsystems Community**

The Dell™ PowerEdge™ R710 takes advantage of Dell's system commonality. By learning the architecture of one PowerEdge system, Information Technology (IT) managers are able to apply that same logic to manage Dell's future generation of servers.

One failing drive in a RAID array can hobble the entire system as the other drives are waiting on it. As for the Dell Command Update, I'm not sure for servers. But when in doubt, check the firmware revisions of the hardware as reported in OMSA and then compare that to what's available for your R710.

#### **Poor raid 5 performance on Dell Poweredge R710 | Tom's ...**

The problem here isn't enterprise grade hardware but rather Vendor lock-in. The appeal with the dell system was the price. 550 euros for 12 cores (6 per processor, 2 processors) and 128gb of memory was quite appealing. Building the same specs on something more portable such as a SuperMicro based system would have been a lot more expensive.
