A ball is thrown at the ground from the top of a tall building. The speed of the ball in meters per second is $v(t) = 9.8t + v_0$, where t denotes the number of seconds since the ball has been thrown and v_0 is the initial speed of the ball (also in meters per second). If the ball travels 25 meters during the first 2 seconds after it is thrown, what was the initial speed of the ball?
