The Honda H22A engine family was a solid engine family from Honda spanning from the early 90s to the early 2000s. This engine was primarily installed in Honda Accords and Preludes, and produced plenty of power to provide a good driving experience, particularly for drivers in these fairly lightweight cars.

The B-series are a family of inline four-cylinder DOHC automotive engines introduced by Honda in 1989. Sold concurrently with the D-series which were primarily SOHC engines designed for more economical applications, the B-series were aimed more as a performance option, featuring dual-overhead cams along with the first application of Honda's VTEC system available in some models.

The Honda H engine was Honda's Larger high-performance engine family from the 1990s and early 2000s. It is largely derived from the Honda F engine with which it shares many design features. Like Honda's other 4-cylinder families of the 80s and 90s, It has also enjoyed some success as a racing engine, forming the basis of Honda's Touring car racing engines for many years, and being installed in ...
