Geb was born out of a desire to make browser automation (originally for web testing) easier and more productive. It aims to be a developer tool in that it allows and encourages the using of programming and language constructs instead of creating a restricted environment. It uses Groovy's dynamism to remove the noise and boiler plate code in order to focus on what's important

1.1 What is Bash? Bash is the shell, or command language interpreter, for the GNU operating system. The name is an acronym for the 'Bourne-Again SHell', a pun on Stephen Bourne, the author of the direct ancestor of the current Unix shell sh, which appeared in the Seventh Edition Bell Labs Research version of Unix. Bash is largely compatible with sh and incorporates useful features from the ...
