### **CodeGym is an online programming course to learn Java**

Java is a programming language used for both client-server programs, web applications and Android development. It is one of the most popular programming languages and runs on all platforms via the Java Virtual Machine (JVM). Java's syntax was originally derived from C and C++ and was created by Sun Microsystems between 1991 and 1995. While it is mostly considered to be an object-oriented ...

### **Java | Pluralsight**

Dynamic programming can be implemented in two ways – Memoization ; Tabulation ; Memoization – Memoization uses the top-down technique to solve the problem i.e. it begin with original problem then breaks it into sub-problems and solve these sub-problems in the same way.. In this approach, you assume that you have already computed all subproblems.

### **Dynamic Programming Problems and Solutions - Sanfoundry**

JCiP home page. I was fortunate indeed to have worked with a fantastic team on the design and implementation of the concurrency features added to the Java platform in Java 5.0 and Java 6.
