Usually after you get an ICD, you'll be asked not to drive for a week. If you got an ICD after fainting or surviving cardiac arrest, you may have to wait several months before you get back behind the wheel. You can't drive commercially (as in a delivery truck or a taxi) at all if you have an ICD.

Is It Safe To Drive If You Have A Heart Arrhythmia - WebMD

The 'hours before driving' calculation is not based on any drink drive limit - it is the length of time when the alcohol in the drinks you've consumed is likely to have passed through your body. This is when we suggest you will be 'safe to drive'.

The Morning After Calculator - When will you be safe to drive?

A new study finds that people with syncope, or fainting spells, can drive safely with minimal or no risk of passing out while driving.

People With Fainting Spells May Be Able to Drive Safely

Ask The Driving School Instructor: Driving With One Hand. Most people tend to put their hand at the top of the steering wheel. If you were to turn your body to look for or to reach for something, you may inadvertently pull the wheel in the direction your body is turning. If that happens while your eyes are off the road, you could drive over into the other lane or off the side of the road.

Ask The Driving School Instructor: Driving With One Hand ...

The Safe Choice. When handled by a professional driver from a reputable transportation company, the driving is by far as safe as it gets. These drivers and companies have the most experience doing this and it is in their best interest to make sure everything goes smoothly.
