To understand the flow of costs in job order costing system, we shall consider a single month's activity for a company, a producer of product A and product B. The company has two jobs in process during April, the first month of its fiscal year. Job 1, of 1000 units of product A was started in march.

### **Job Order Costing System - The Flow of Cost Journal ...**

Job costing vs. process costing. Job costing (known by some as job order costing) is fundamental to managerial accounting. It differs from Process costing in that the flow of costs is tracked by job or batch instead of by process.. The distinction between job costing and process costing hinges on the nature of the product and, therefore, on the type of production process:

### **Job costing - Wikipedia**

Job costing involves the detailed accumulation of production costs attributable to specific units or groups of units. For example, the construction of a custom-designed piece of furniture would be accounted for with a job costing system. The costs of all labor worked on that specific item of furniture would be recorded on a time sheet and then compiled on a cost sheet for that job.
