The supply pump used with the ISUZU 4HK1 engine is an HP3 type adapted to positive pressure filter use. In comparison to conventional supply pumps, the 4HK1 engine supply pump includes a feed pump outlet port, and main filter pump inlet port. Positive pressure is applied to the main filter by sending fuel from the feed pump to the main filter.

I stopped by the local wrecking yard and they had an Isuzu 4HE1 available. This an automatic version (I undersand there is a difference between the auto and manual version of the engine). I know very little about this engine other than the specs sound great to me. Additionally, this particular engine only has less than 40K miles on it.
