Baby can be used to refer to any child from birth to age 4 years old, thus encompassing newborns, infants, and toddlers. The Merriam-Webster dictionary simply says a newborn is a child who is recently born and does not put an upper limit to the term. Merriam-Webster also defines an infant as a child in the first stage of life but doesn't give ...

Benjamin McLane Spock (May 2, 1903 – March 15, 1998) was an American pediatrician whose book Baby and Child Care (1946) is one of the best-selling volumes in history. The book's premise to mothers is that "you know more than you think you do." Spock was the first pediatrician to study psychoanalysis to try to understand children's needs and family dynamics.

Generally, the terms baby and child are considered the same, however there is a clear cut difference between them. The difference between a baby and a child is based on its growth and the age of the baby. A baby is generally used for a child from birth to age 4, while a child is any infant from three month to one year old.
