Passing and merging objects for more flexibility. The above code, like many ways of doing default arguments, can't pass arguments out of sequence, e.g., passing optionalC but leaving optionalB to fall back to its default.. A good option for that is to pass objects and merge with a default object.

Is there a better way to do optional function parameters ...

Introduction. RxJS is a library for composing asynchronous and event-based programs by using observable sequences. It provides one core type, the Observable, satellite types (Observer, Schedulers, Subjects) and operators inspired by Array#extras (map, filter, reduce, every, etc) to allow handling asynchronous events as collections.. Think of RxJS as Lodash for events.
